

Installation

I use DigitalOcean on this demo.

1. Click **Access**
2. On **Droplet Console**, click **Launch Droplet Console**.
3. Upgrade you system by this command:

```
sudo apt update && sudo apt upgrade -y
```

4. Install `wget` for downloading.

```
sudo apt install wget curl -y
```

5. Download the installation script:

```
wget -O install.sh http://www.aapanel.com/script/install_6.0_en.sh
```

6. Run the installation script:

```
chmod +x install.sh  
bash install.sh
```

After the installation, you will see login information. Login into your aaPanel using that login information.
