

Source Installation

Preparation

1. Add subdomain for your site on your zone management.
2. Create a new site on `Website` on aaPanel.

Installation

1. Open **Terminal** on aaPanel
2. Clone the project from Github:

```
git clone https://github.com/opensource-socialnetwork/opensource-socialnetwork.git
```

3. Click site name on **Website**.
4. Click **Site directory**.
5. Click folder icon to browse folders.
6. Select where OSSN was cloned.
7. Click **Save**.
